

QuikDeck®

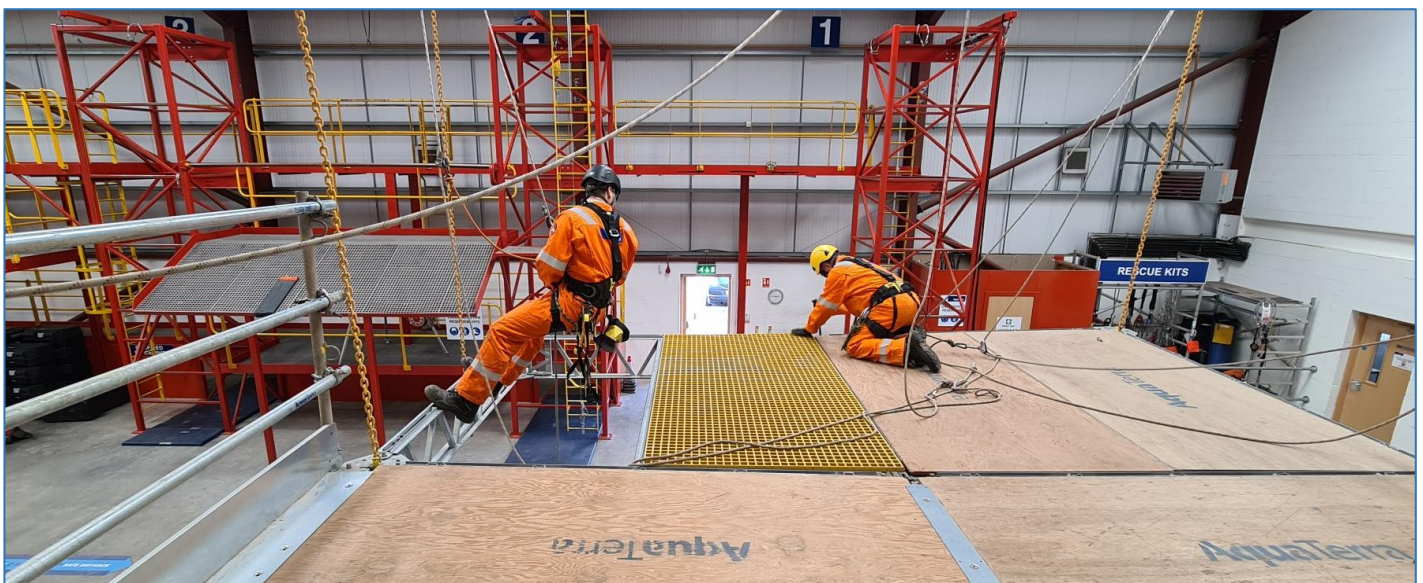

SUSPENDED ACCESS SYSTEM

Today's highly competitive construction and maintenance programs demand bespoke methods of access that deliver the optimum levels of safety and efficiency.

Optimised by AquaTerra's engineering and installation expertise, QuikDeck® modular access platforms provide clients with unrivalled quality of access.

With flexible designs to accommodate obstructions and rapid installation times, QuikDeck® delivers the ultimate access for multiple personnel and equipment.

Rapid, safe and cost-effective.

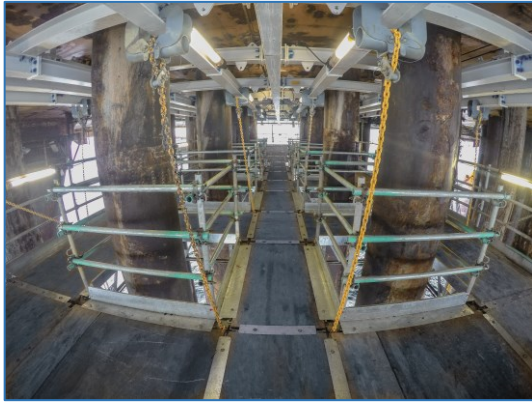

Offshore installations

Bridges & stadiums

Piers & jettys

Facades & atriums

TECHNICAL SPECIFICATION

3.6kN distributed load capacity

2.5m loadable cantilever

4.5kN point load capacity

32kg/m² system self weight

OPERATIONAL BENEFITS

Up to 80% reduction in installation time

Multi-level platform capability

Easily installed around various obstacles

Up to 60% reduction in contact points

Harness-free working once complete

Built in the air or hoisted

SAFETY FEATURES

Fully encapsulated & drops protected

Clearly defined inspection protocol

AquaTerra in-house installation training

Minimised obstructions & trip hazards

Structural stability

Collective protection

DESIGN CAPABILITY

QuikDeck® & primary structure 3D modelling

Appropriate design standard compliance

Project specific static & dynamic load analysis

Independent CAT III checks & DNV approval
